

Ø Logimat

Automatic vertical lifts are the ideal alternative to store and pick small parts in a compact and ergonomic way. A LogiMat® automatic vertical lift is comparable to an oversized drawer cabinet with two stacks of trays (one in the front and one in the rear). Between those stacks operates a lift, which pulls out individual trays as required and delivers them to the service window. The Logimat offers various standard tray dimensions and thus the machine's height, width and depth can be adjusted to your needs.

Key Benefits of the LogiMat® vertical lift storage:

- Save up to 80% of storage space in comparison to conventional static storage solutions
- With its modular design and numerous options, the system is fully adjustable to your individual requirements

- Logimat can offer varies standard height (min.2475mm with each increment of 75mm till max. 13000mm), 5 standard width (1650mm,2000mm,2500mm,3000mm & 4000mm) and 2 standard depth (650mm & 820mm)
- With process automation, you will increase order picking speed by a factor of 6 to 10
- Decrease travel times by more than 70%
- Minimize order picking errors through computer-controlled processes
- Achieve an increase in performance of up to 20% thanks to its ergonomic design
- Reduce costs for energy and storage thanks to its compact design

Compatible Vertical Lift Modules

Our order picking system is future-proof and extremely user-friendly. With its ergonomically thought-through components, LogiMat® fits in smoothly with the rest of the SSI Schaefer [ergonomics@work®](#) product range.

Numerous options offer our customers plenty of flexibility and room for extensions:

- A laser pointer to identify picking position
- Ability to adjust the height of opening according to user login, improving ergonomics at work.
- Tilting the removal tray for better view and easy reach of the parts.
- Light barriers and an electrically driven shutter door keeps goods in the Logimat safe and secure.
- External accessories: A cart on rollers, which can transports the entire tray, on full load or empty. It can also be connected to the host wirelessly for order picking.
- Limitless choices of compartmentation on tray. Visit [Plastics Containers](#) for an extensive range of products.
